

Important Alert For Travelers

NDOT - For traffic safety, the Nevada Department of Transportation has temporarily closed a portion of **State** Route 207 (Kingsbury Grade) following a sinkhole created by an eroding drainage pipe underneath the roadway.

The road will remain closed from the State Route 206/Foothill Road junction in the Carson Valley to the summit. Kingsbury Grade will remain open in the Lake Tahoe area to residential and business traffic between U.S. 50 and Tramway Drive at the summit.

Alternative routes between the Carson Valley and Lake Tahoe are available through U.S. 50, State Route 431 and various routes in California.

NDOT has been closely monitoring and will be contracting for emergency repairs to the sinking area of the roadway which developed over the past two weeks where a drainage pipe crosses underneath the road at mile marker 4.3, approximately 10 miles up the road on the Carson Valley side.
